Flag — Old 401(k), prior employer. This account still lists **Jessica Reyes** (Marcus's first wife, divorced 2019) as the sole primary beneficiary, dated 2019, with no contingent listed. Marcus believes he "updated everything" after the divorce. This designation was not updated. As it stands, if Marcus died before the rollover, this account (approximately \$96,000) would pass to his ex-spouse, not to Tanya.

This is the reason the rollover matters beyond convenience: rolling the account into Marcus's IRA places it under the IRA's correct beneficiaries. Confirm the designation with the custodian before relying on any of the above. Confirm every row against the custodian's record, not the client's memory.
